Profile

Hello. I am Rakhimov Rashidbek. Currently, I am a highly skilled Java Backend Developer. I have extensive experience in developing applications using Java, Spring Boot, and Hibernate. My expertise includes working with databases such as PostgreSQL and MySQL, as well as front-end technologies like HTML, CSS, and JavaScript. I am proficient in using tools like Git, Docker, and Postman for project management and collaboration. I am also familiar with Agile methodologies and have a strong understanding of SOLID principles.

Projects

Java Backend Developer

Mar 2022 - Nov 2022

Khorezm

AGRO CLUSTER -the working mechanism of the agro cluster program is that it provides an opportunity to constantly monitor the expenses and income of the land areas belonging to the agro clusters according to their activities. By inputting primary data, it helps each farm to generate cost and income reports and thereby other financial statistics.

And through the reports that have been formed during the year, it allows us to clarify the issues of which area and how to plant crops for the next period will bring more benefits, and will show which areas and what crops to plant for the next year can be planned.

Java Backend Developer

Dec 2022 - May 2023

Khorezm

CHORVA CLUSTER - livestock cluster program is a program designed for all clusters engaged in livestock activities. This program allows livestock clusters to form their costs and income from the time of bringing the animals to the end of the finished product into meat. It also shows that by tracking the development trend of each cattle, it is possible to divide the cattle into groups of development levels, thereby indicating the need to discard animals that take more time and cost more to develop.

Full-stack Developer

May 2023 - Dec 2023

Khorezm

Program for "KhorezmTex" MCHJ - fully automating the operation of a cotton processing factory is a program that allows you to regularly monitor all the processes in it through this program and reduce all costs in the process, from the purchase of cotton raw materials to the appearance of the finished product. allows you to track through this program.

Full-stack Developer

Aug 2023 - Feb 2024

Tashkent

STARK (for CHSM LLC and Leader Beton LLC) - the program is a program for managing the sales of the products of the organization engaged in several activities producing construction raw materials, maintaining the cost estimate of the raw materials produced within the scope of its activities, and forming other financial reports.

Java Backend Developer

Feb 2024 - Mar 2024

Tashkent

"Azizam Bot" was developed for the psychologist sister's channel in order to segment the subscribers of the currently active channel based on their age,

gender, profession, from which region they watch the activity of the channel, and to identify their problems. It also allows you to send individual messages to representatives of each category through this bot.
